

PROJECT PLANNING AND MANAGEMENT

What is it? Project Planning Management (PPM) involves organizing resources, task and schedules to meet specific goals within a set budget and timeline. it includes setting clear objectives, creating, actionable plans, assigning resources and monitoring progress. Effective PPM ensures projects are completed on time, within budget and to the required quality standards, making it essential for project success.

Problems You Faced In Project Planning & Management

Project Planning Management is crucial for successful project execution, but it comes with its own set of challenges, here are some common problems you could face during PPM.

- ✔ **Uncertain Goals** : Unclear project goals cause confusion and misalignment.
- ✔ **Resource Allocation** : Difficulty in labor, supplies and machinery management.
- ✔ **Communication Gaps** : Poor communication leads to delays and mistakes.
- ✔ **Dynamic Changes** : Project scope, budget and schedule changes disrupt planning.
- ✔ **Lack of Transparency** : Causes Delays, mistakes, confusion & hidden project issues
- ✔ **Risk Management** : Failure to foresee risks and create backup plans.

What do biCanvas have for you on this problems?

biCanvas streamlines project planning with tools designed to tackle common challenges. It ensures smooth collaboration, transparency and efficient resource management, making project execution easier.

- ✔ **Planning and Execution**: Set clear goals with smart scheduling & real-time tracking updates.
- ✔ **Resource Management**: Easily allocate and track workers, equipment, supplies.
